

# The **NEXT** GENERATION of Genetics

## **TL 6300**

A true F1 line developed through extensive meat quality research and testing. This unique sire line excels in meat color, high Ph values, marbling, taste and tenderness.

**TL 6300** ranked first in the growth, lean gain and meat quality indices in the National Barrow Show® Progeny Test.

**TL 6300** produces a truly premium quality market hog.

## **TL 6500**

A true F1 line developed to add maternal heterosis while still providing milk, mothering ability, reproductive traits and maintaining high pork quality.

**TL 6500** ranked first in the crossbred division for growth and meat quality indices in to the National Barrow Show® Progeny Test.

**TL 6500** gives you F1 natural breeding performance for maximum conception, litter size and longevity.

**TRULINE GENETICS** has been consistently at the top of the National Barrow Show® Truckload Carcass rankings during the past several years!

## **Your Natural Choice**

- All Truline genetics are produced antibiotic free from birth to market
- Genetic selection with no antibiotic support will enhance natural genetic health and disease tolerance
- Genetics selected for antibiotic free outdoor production units

## **Good Taste in Genetics™**

- A maximum four breed combination that gives a high level of terminal and maternal heterosis
- Both lines maximize pork quality with documented winning results through the National Barrow Show® Progeny Test
- True F1 genetic consistency that delivers maximum conception, litter size and longevity

*Creating genetic systems designed for your success.*

# TRULINE<sup>®</sup> genetics

## Nucleus components of the TRULINE EASY MAX SYSTEM

### TRULINE *Berkshire*

Selected for a combination of growth and maternal strength with superior loin color, marbling and tenderness.

### TRULINE *Duroc*

Selected for fertility, fast growth, efficient feed conversion, superior meat quality, durability and high lean gain.

*Based on a 50 year vision and commitment to the development of profitable and user-friendly genetic lines.*

### TRULINE *Hampshire*

Selected for fertility, maternal performance, milk quality, feed intake, natural toughness and Napole-free status.

### TRULINE *Landrace*

Selected for fertility, high appetite, ultra milk production, extreme longevity, prolificacy and 21-day litter weights, with additional emphasis on meat quality.

# TRULINE EASY MAX BREEDING SYSTEM

## *Breeding Simplicity*

### The benefits are simple:

- Dual-line rotational breeding system that is **simple** and **efficient**
- Allows gilt retention from within the herd for **maximum health** and **reproductive performance**
- Sow herds that capitalize on longevity, appetite, fertility and maternal performance **in any environment**
- Terminal offspring continue maximum **performance** and **efficiency** with the level of pork quality required for high-end, value-added markets
